Index to volume 24

Watson, C.J.: The influence of soil properties on the effectiveness of phenylphosphorodiamidate (PPD) in reducing ammonia volatilization from surface applied urea 1

Watson, C.J., Stevens, R.J. and Laughlin, R.J.: Effectiveness of the urease inhibitor NBPT (N-(n-butyl) thiophosphoric triamide) for improving the efficiency of urea for ryegrass production 11

Bolland, M.D.A.: The maximum yield potential of subterranean clover swards achieved from superphosphate applications is influenced by the maturity and the plant density of the swards 17

Bolland, M.D.A. and Gilkes, R.J.: Cultivation reduces fertilizer residual effectiveness and affects soil testing for available phosphorus 33

Sahrawat, K.L., Anjaiah, V. and Nambiar, P.T.C.: Effects of mineral nitrogen and *Bradyrhizobium* inoculation on growth and iron nutrition of groundnut 47

Fertilizer Technology Research

Anwar-ul-Haq, M., Ahmad, I., Niazi, M.T., Arif, M. and Mahmood, K.: Evaluation of problematic indigenous phosphate deposits for phosphoric acid manufacture *Part I. Bench scale studies* 53

Averitt, D.W. and Gliksman, J.E.: Free water in phosphogypsum 57

Tennakone, K., Ketipearachchi, U.S. and Weragama, U.: Optimising P_2O_5 availability for fertilizer use, by direct treatment of apatite with hydrochloric or nitric acids 63

Sundara, B. and Subramanian, S.: Changes in soil available NPK in multiple cropping systems based on short duration sugarcane crops relative to a conventional sugarcane cropping system 67

Carter, M.R. and Cutcliffe, J.A.: Effects of gypsum on growth and mineral content of Brussels sprouts, and soil properties of Orthic Podzols 77

Singh, A.L., Joshi, Y.C., Chaudhari, V. and Zala, P.V.: Effect of different sources of iron and sulphur on leaf chlorosis, nutrient uptake and yield of groundnut 85

Singh, A.L., Joshi, Y.C. and Chaudhari, V.: Effect of different sources of iron and sulphur on nutrient concentration and uptake by groundnut 97

Singh, J.P., Dahiya, D.J. and Narwal, R.P.: Boron uptake and toxicity in wheat in relation to zinc supply 105

Graziano, P.L.: Improvement of nitrogen efficiency by addition of ammonium thiosulfate in the liquid fertilization of maize 111

Morel, C. and Fardeau, J.-C.: Agronomical evaluation of phosphate fertilizer as a nutrient source of phosphorus for crops: isotopic procedure 115

Book review 123

Bolan, N.S. and Hedley, M.J.: Dissolution of phosphate rocks in soils. 2. Effect of pH on the dissolution and plant availability of phosphate rock in soil with pH dependent charge 125

McCarty, G.W., Bremner, J.M. and Krogmeier, M.J.: Evaluation of ammonium thiosulfate as a soil urease inhibitor 135

Mahimairaja, S., Bolan, N.S., Hedley, M.J. and Mcgregor, A.N.: Evaluation of methods of measurement of nitrogen in poultry and animal manures 141

Chien, S.H., Sale, P.W.G. and Friesen, D.K.: A discussion of the methods for comparing the relative effectiveness of phosphate fertilizers varying in solubility 149

Le Mare, P.H. and León, L.A.: Effects of residues of triple superphosphate on the quantity-intensity relationships of fresh phosphate in some soils from Brazil and Colombia 159

Walworth, J.L. and Sumner, M.E.: Alfalfa response to lime, phosphorus, potassium, magnesium, and molybdenum on acid ultisols 167

Saggar, S., Hedley, M.J. and White, R.E.: A simplified resin membrane technique for extracting phosphorus from soils 173
